Natalie Block

Valdosta, GA 30306 (832) -525-9850 natalie.rblock@gmail.com

Education

Emory University Atlanta, Georgia
Master of Science in Public Health, Biostatistics May 2026

- Certificate: Data Science
- Thesis: *Clonal Hematopoiesis of Indeterminate Potential and the Inflammatory Plasma Proteome in the UK Biobank*

Texas Tech University Lubbock, Texas
Bachelor of Science, Cell and Molecular Biology May 2024

- Minors: Mathematics and Chemistry

Skills

Programming Languages:
R , Python (pandas, NumPy, scikit-learn, PyTorch), SAS
Statistical Methods:
GLMs, GLMMs, GAMs, Survival Analysis
Machine Learning:
CNNs, Random Forests, LLMs
Data Visualization:
R Shiny, Tableau, ggplot2, Matplotlib, Seaborn, Excel

Projects and Websites

CHIP and Inflammation – Shiny Dashboard

Work Experience

Conneely Lab, Emory University Atlanta, GA
Graduate Research Assistant September 2024-Present

- Analyze large-scale population cohort (n≈500,000) using R, implementing data cleaning, mixed-effect modeling, and visualization
- Review and apply statistical methods from literature to improve accuracy and efficiency of analysis
- Collaborate with geneticists, statisticians, and computational biologists to design and test self-driven hypotheses about genetic variants' effect on protein abundance

HHMI SEAPHAGES Program, Texas Tech University TLPDC Lubbock, TX
Learning Assistant August 2023-May 2024

- Performed DNA sequencing data quality control and assembly, contributing to characterization of 3 novel bacteriophages
- Led twice-weekly microbiology/genomics lab sessions, guiding students through wet-lab and computational research methods

Henkemeyer Lab, UT Southwestern Dallas, TX
Research Intern May 2023-August 2023

- Extracted and identified protein targets across multiple sample types using western blotting
- Quantified protein expression and analyzed treatment-related differences to characterize molecular responses
